Thermogenic Series Cremation Unit CU-200

Made in Canada

Commercial Burner Service (CBS) is a trusted name in the cremation industry with over 50 years experience. We are a Canadian company at the forefront of technology for cremation and environmental equipment.

CBS stands behind its equipment with a diversified line of products and an Industry leading Service Department. We offer a wide range of products for human and animal cremation as well as a complete line of emission monitoring systems.

Our service technicians possess the necessary fuel licences to provide complete service for your equipment including gas, electrical and refractory work.

As a complete service provider, we are equipped to handle all aspects of your project from the planning and approval stages through to the installation and commissioning of your new unit.

- Ideal for high volume applications
- Quadra-Flow secondary chamber effectively consumes high volume emissions
- Large loading door to accommodate oversized containers
- Designed to provide reliable and efficient operation
- Average cremation cycle of less than 90 minutes
- Fully automated cremation and cool down cycles
- Rear enclosed blower provides quiet cremator operation
- Fuel options: Natural Gas and Propane
- Electrical options: 240/575 Volts AC, Single or Three phase
- Control Panel options: left Side, right Side, or Remote Mount
